

# ACRO-Tech™

## TEXTURED FINISH

**GORDON**  
INTERIOR SPECIALTIES DIVISION

- ACRO-Tech acoustical transparent, textured finish is applied to a metal substrate and provides the appearance of a painted, level 5, fine texture drywall coating. The finish is intended for ceiling systems and wall systems that are installed out of reach by occupants.
- Available in white. Custom colors can be created.
- Applied to perforated metal with acoustical media = NRC up to 0.90
- Installed flat, sloped, curved, or segmented to simulate vault conditions
- Panel sizes up to 4' x 8'
- Light reflectance = 92.5 with 5 gloss level at 60 degrees
- Gloves are necessary during installation. Materials will stain easily if not handled properly.
- Contributes to LEED®<sup>1</sup> Certification

<sup>1</sup> LEED® is a registered trademark of U.S. Green Building Council
