

ACROSTAT™

ANTIMICROBIAL POWDER COAT

ACROSTAT is an additive that can be included in any ACROGUARD®, ACROGUARD®-UVX, and standard powder coat finishes. ACROSTAT provides maximum resistance to the growth of bacteria and fungus and as such helps maintain a safer, more sanitary environment. ACROSTAT is the perfect finish for hospitals, public facilities, schools, pharmaceuticals, nursing homes, hotels, and restaurants.

FEATURES

- Inhibits the growth of bacteria and fungus
- Reduces nosocomial infections in healthcare environments
- Supplements hygienic cleaning protocols
- Reduces costs in cleaning and offers residual protection against new contamination
- Efficacy - Lasting effectiveness throughout the life of the finish

Protection against microbes begins with proper hygiene and cleanliness. Cleaning procedures can be costly, time consuming and do not offer the residual protection against new contamination. The use of ACROSTAT is a perfect way to provide secondary protection against microbial contamination by supplementing proper hygiene practices. ACROSTAT is a durable powder coat finish that uniquely inhibits the growth of a wide range of microbes.
